

43. Florence Lake Creek fishpass/ stocking *112-17-10250*

An 840-acre lake in this system and most of the upper watershed is located outside of wilderness, on Shee Atika Inc. land. There is a vertical falls barrier approx. 1 mile from saltwater. Potential study site to determine effects of sockeye introduction on resident cutthroat trout. She Atika expressed interest in participating in an enhancement project. Project was dropped because of high costs and concerns for resident cutthroat trout population.
